

Solderless Unibody Switch CHANGELOG

Version 1.0 | Date 8/12/2021

- Device is designed and test printed
- Device is assembled and tested
- Device files and instructions are posted on the forum for feedback

Version 2.4 | Date 10/6/2021

- Bottom section of 3D printed body is sunk in to prevent the zip tie from impacting the stability of the device when on a table
- Top section of device is redesigned from a slope to a swooping design for a more ergonomic interaction when using the device with a finger and to prevent the device from sliding away from the user
